

Dear native mobile team.

Thank you very much for your efforts on developing and testing [Fleksiluotto.fi](https://www.fleksiluotto.fi)'s new mobile app for 4finance Oy. The launch and development process was very effortless for our team and we appreciate the great job you did with the application.

We were especially satisfied on the look and the user interface functionalities that made it easy to use and adapt.

We hope you will continue creating new applications in the future and take part in developing the products for the partners in the same way you have done with us.

We now thank you all for your good work.

On the behalf of the whole Finland's team,

Julia Bostrom

Digital marketing specialist
